**We are now offering 5G plans,
which will not only enhance your
business mobile capabilities but
provide fibre-fast mobile
broadband and large scale IoT.**

What does it all mean for you, the user?

Much higher download and upload speeds

**Reducing the time it takes for a
connected service to respond to you**

**Far greater capacity, enabling many
more people to get a signal even in
very crowded areas, such as football
stadiums and railway stations**

Fifth Generation (5G) Technology

High Speed Technology

5G is the fifth generation cellular technology that will increase the downloading and uploading speeds over the mobile network.

Machine-to-Machine Interaction

5G will be the first technology to facilitate machine-to-machine communication, the foundation of Internet of Things (IoT).

Boost to the Economy

5G is expected to create a cumulative economic impact of USD1 trillion in India by 2035

- It will give a huge amount of economic boost to India by increased connectivity between machines and various sectors which will in turn increase efficiency.
